

# CANCER – DIAGNOSING AND TREATMENT

## CHAPTER 14 LESSON 3

PAGES 455-456

NAME \_\_\_\_\_ PERIOD \_\_\_\_\_

1. Define **Biopsy**- (455)
  
2. List the **3 most common cancer treatments**: (456)  
 \_\_\_\_\_
  
3. Cancer patients **usually receive** at least \_\_\_\_\_ of these treatments and sometimes all \_\_\_\_\_.
  
4. **Surgery** is used to treat some cancers, including \_\_\_\_\_, \_\_\_\_\_ and \_\_\_\_\_.
  
5. **Surgery** is most effective when the cancer is \_\_\_\_\_ in one part of the body.
  
6. **Radiation** uses \_\_\_\_\_ or other forms of \_\_\_\_\_ to kill cancer cells.
  
7. **Radiation** works best to kill cancer cells limited to a \_\_\_\_\_ area and to kill those that may still remain after \_\_\_\_\_.
  
8. More than \_\_\_\_\_ of all people with cancer are **treated** with radiation therapy.
  
9. **Chemotherapy** is the use of \_\_\_\_\_ medicines to \_\_\_\_\_ cancer cells.
  
10. Doctors use **chemotherapy** to fight cancers that have \_\_\_\_\_ beyond one location or occur \_\_\_\_\_ the body.
  
11. **List 3 side-effects** of radiation and chemotherapy treatments:  
 \_\_\_\_\_
  
12. **Side effects differ** from person to person depending on \_\_\_\_\_, the type of \_\_\_\_\_, and the \_\_\_\_\_ of the cancer in the body.
