## **A HEART ATTACK**

During a heart attack, a coronary artery becomes blocked. As a result, part of the heart dies because it does not get enough oxygen from the blood. What are the symptoms of a heart attack?

▼ Regular physical activity is a positive behavior that strengthens the heart. It can help people with hypertension reduce their need for medication. **What kinds of physical activities strengthen the heart?**

**TREATING HEART DISEASE (Pg. 450)**

<b>List Name of TREATMENT</b>	<b>DESCRIBE The Method</b>
