HOW TO REMOVE THE GREEN SCREEN FROM VIDEO

Drag your background picture that you want to Video 1 ➤

Drag your green screen video to Video 2 ➤

Go to the **Effects Tab** in the Projects viewer (lower left of screen)

- Search for Chroma to find **Chroma Key**
- Drag the Chroma Key effect over on top of your green screen video

Make sure your CTI is on the green screen video and that you have selected the green screen video frame in timeline

- Look in the Source Viewer (top left)
- Choose the Effect Controls Tab
- Under Chroma Key you will see color with a dropper and swatch
- Click the dropper and go over to the Program Viewer (top right) and click once on the lightest part of the green
- Go back to the Source viewer and click and drag to the right the orange percentage next to Similarity (you should see the green disappear)
- Click on Blend below Similarity and slowly slide the orange number on the right to try to get rid of the green glow around the person
- You may need to get the dropper a second time and repeat to get all green

In addition, you may need to use the Rate Stretch tool so that your picture lasts for the duration of your video.
